

Satellite Unlimited

Affordable, High Volume Asset Tracking

Global. Bundled. Affordable.

Satellite Unlimited provides high volume, affordable asset tracking of remote assets through a bundled, managed service solution virtually anywhere across the globe. Leveraging the Numerex Global Satellite Network, this unique package offers unlimited satellite data and unprecedented asset visibility.

SOLUTION INCLUDES

Hero Certified SX1™ Satellite Tracking Device

Combination Run Time and Line Power Cable

Numerex Global Satellite Service

SmartGuide™ Tracking Mobile Application

KEY BENEFITS

No upfront investment in hardware or software

Single, flat rate offers economical solution

High volume messaging is expandable to include cellular devices

Device replacement policy reduces maintenance costs

HERO (Hazards of Electromagnetic Radiation to Ordnance) meets or exceeds 16 methods within the MIL STD 810 F requirements

Device

Numerex Global
Satellite Network

SmartGuide

Deploy Satellite Unlimited and immediately begin tracking your remote assets in the field every five minutes*, all day, every day from your computer, tablet or mobile device.

Satellite Unlimited - Track. Monitor. Optimize. Secure.

*Unlimited service supports daily reporting up to once every five minutes.

Numerex
Smart Data Delivered™

NUMEREX DNA® COMPONENTS:

DEVICE

The SX1, paired with a combination run time and line power cable, supports high volume messaging for mission critical and high value asset monitoring.

NETWORK

Numerex offers a comprehensive satellite network service enabled by 32 Low Earth Orbiting (LEO) satellites. The service provides low latency, reliable messaging that is supported in over 120 countries with global maritime applications using secure Code Division Multiple Access (CDMA).

APPLICATION

Built for real-time tracking, SmartGuide is a feature-rich, cloud-based tracking application that is cellular or satellite network capable and encompasses global cellular or satellite plans.
